Career Hub

RESUME · COVER LETTER · JOB TRACKER

Start Here

Your next step, organised.

Runs in your web browser. No account, no subscription, nothing to install. Setup takes about a minute.

On your laptop or desktop

1. Unzip **Career-Hub.zip**. Move **Career-Hub.html** to a folder where it will stay, such as Documents.
2. **Double-click it.** It opens in your browser.
3. Bookmark it. Use the same browser each time.

On your phone or tablet

1. Phone file managers often show only a preview. Use your private link below instead.
2. Open it in your phone's browser.
3. Bookmark it or add it to your Home Screen.

YOUR PRIVATE ONLINE LINK

Open →

Scan the code with your phone camera. Everything you enter saves only in the browser and device you use.

Your first minute

1. **Hub:** see your next step and your job search at a glance.
2. **Experience Bank:** add your roles and achievements once.
3. **Resume Builder:** pick a layout and build an ATS-friendly resume.
4. **Cover Letter:** write a letter for each application.
5. **Job Tracker:** log applications and follow-ups.

The one rule: your data lives in your browser

Career Hub saves automatically on this device only. **Use the same browser and file location each time.** Do not open it from inside a zip or email preview. Use **Export backup** regularly. Private browsing or clearing browser data can erase your data, so back up first.

Keep it safe, keep it simple.

Moving to a new device

Old device: use **Export backup** and keep the downloaded file outside the browser. New device: use **Restore** and confirm to replace the data. Each browser and device keeps its own data.

Troubleshooting

“My data is gone!”
You probably opened it in a different browser, moved the file, or used private browsing. Open it the way you did before, or restore your latest backup.

My phone shows only a preview.
Use your private online link in a normal browser window.

A backup is rejected.
Keep the original file and use a compatible version of the app.

Saving failed.
Export a backup, check free storage, and do not clear browser data.
