

Welcome to your career workspace.

Keep your experience, applications, and preparation together. A calm space for your next application. Start with your downloaded app.

On your computer

1. Unzip Career-Hub.zip into a folder you will keep.
2. Open Career-Hub.html in a browser.
3. Read the guide, then try Settings > Load demo data.
4. Edit the examples, or use Remove all data to start fresh. Demo edits stay after refresh.

On your phone or tablet

1. Open the website in your browser.
 2. Use the same browser for saved entries.
 3. The layout adapts to the screen; local HTML access and PDF printing vary by device.
- A computer is recommended for initial setup and PDFs.

YOUR DOCUMENT WORKSPACE

Open Resume Builder or Cover Letter to enter the full editing workspace automatically. Templates and Style are on the left; Review and Sections or Letter are on the right. Use Job Tracker to return to your applications.

Your first steps

1. **Experience Bank:** save your Profile, then add relevant roles, projects, education, certifications, skills, and awards.
2. **Resume Builder:** choose a design, refine Style, then use Sections to show, hide and arrange content.
3. **Job Tracker:** record an opportunity and its status, dates, salary notes, and next follow-up.
4. **Contacts:** record useful conversation details and a next-contact date.
5. **Cover Letter:** add a recipient and your own letter; save as PDF.
6. **Playbook:** read the guides and add preparation notes.

Keep a backup of your workspace

Your entries are stored in your browser. Clearing storage, private browsing, or using another browser/device/file location may make entries unavailable.

Use Settings > Export backup after important changes. Restore backup replaces the destination workspace, so export its existing data first. Keep JSON files somewhere you trust. Resume PDFs are not workspace backups.

Good to know

What is included

Hub: counts, application follow-ups, setup checklist, and a suggested next action.

Experience Bank: profile and professional record.

Resume Builder: 24 template styles (3 layouts × 4 colours × 2 header styles), section ordering, font choices, adjustable sizes, A4/US Letter, and on-device review checks.

Job Tracker & Contacts: application stages and conversation notes.

Playbook: 12 Golden Rules and practical preparation guides.

Cover Letter: editable draft, job details, and PDF export.

Save a resume or letter as PDF

Open Resume Builder or Cover Letter and use **Download PDF**. In the browser print dialog:

1. Choose Save as PDF or the system PDF option.
2. Use 100% scale.
3. Turn Headers and footers off.
4. Enable Background graphics for colours.
5. If Margins is offered, choose None.

Review every saved page. Long content may span pages. Follow the employer's format requirements. Word export is not included.

Troubleshooting

Missing entries? Check the original browser and app location, then restore a JSON backup if available.

New device? Export on the old device and restore on the new one.

PDF looks different? Check print settings or try a current desktop browser.

Use the tools thoughtfully

Completion counts filled details. Review checks formatting and content, not ATS approval or hiring chances.

Follow-up dates are in-app prompts, not alerts. Review email drafts and send them in your own email app.

No automatic applying or cloud sync.

Your download & licence

Career-Hub.html + Career-Hub-Start-Here.pdf + LICENSE.txt.

Personal and household use on your own devices. No resale or redistribution outside your household. See LICENSE.txt for full terms.

Thank you for choosing Career Hub. It truly means a lot.

Your experience matters. Make it clear, keep it organised, and take your next step with care.

Need help? Message **KaelLabs on Etsy**: device + browser + exact step. Leave out private career details.

If Career Hub helps you, a short honest review would mean the world and helps other job seekers find it. Reviews are optional; support is always here, whether you review or not.

Planning more of life? Visit **KaelLabs on Etsy** for more calm, private, pay-once tools.
